

## THE INTEGRATED POLICY OF ECon ENGINEERING GERMANY GMBH

**eCon Engineering Germany GmbH** is an innovative and stable partner for its customers, with its dedicated employees it is the best, significant brand of professional technical services and in the course of its activities it pays special attention to the security and the confidentiality of the Customers' data. To this end, it operates a complex, interdependent, integrated management system (ISO 9001:2015, ISO/IEC 27001:2013), which, in addition to producing quality products and services and protecting data confidentiality, also guarantees the availability of information systems to the necessary extent.

In this context, the main aspirations of our company are as follows:

- ▶ to comply with the information security requirements set by our buyers and required by the authorities and by legislation;
- ▶ to guarantee the confidentiality, integrity and availability of the customer data of the numerical analysis activity and our own business data;
- ▶ to provide full, closed, risk-based information security, in keeping with the principle of access to necessary and sufficient information;
- ▶ to regularly monitor the information security risks and to determine the necessary actions based on them.
- ▶ to ensure that our operations bring economic benefits, with which we carry out value-creating activities, while contributing to the growth of our owners, employees and our environment;
- ▶ to assess the needs of our partners and further increase the added value of the given product/service with our solution proposals;
- ▶ to further increase the business stability and the profitability of our company by assessing and managing the emerging business and information security risks;
- ▶ to provide the highest possible technical services and products as a result of our acquired knowledge, experience as well as research and development work;
- ▶ to maintain and develop the qualifications, knowledge, experience, commitment and creativity of our employees as the core value of our company;
- ▶ to lead the development and localisation of world-class and innovative technologies and the dissemination of numerical simulations;
- ▶ to continuously improve the efficiency of our complex, interdependent integrated management system, updating it in accordance with the requirements of our buyers and the requirements of the authorities and legislation as well as complying with the ISO 9001:2015, ISO/IEC 27001:2013 requirements.
